COTTON MARKET.

Quotations furnishes by W. B. Hibbs & Ca., members of the New York Stock Eachange, Hibbs Building.

New York, July 7.—The cotton market was active and lower this morning. The weather map showed rains for the previous day and night, extending throughout Eastern and Southern Texas, with showers in the central portions of that State and Okishoma. The wilcums of rainfall was nowhere excessive or amficient to active the needs of the decouple-difficied sections, of Texas and Okishoma. But the market appeared to have an overfood forg centracts and liquidation was severe and very according to a while.

An analysis of the rainfall showed light precipitation where, according to the map of the previous day, a very heavy downpoir had been reported. During Thurndey's session over four inchice of rain was posted for Ardmore, Okia, Very light moisture was reported elsewhere in that State, and this brought about private frequiry, with the result that a correction was made aboveing that less than half an inch result feel at that point, As a matter of fact, sections of Texas where the heavy rain was reported makes very little cotton. Southern Texas is in good condition, as well as those assan near Houston.
